## // EXPERIENCE

### Fullstack Engineer

*Versett Inc | 2022 - 2023*

- Engineered CMS solutions for clients with flexible components, customized to their needs, utilizing Javascript, React & PHP
- Collaborated with designers to create interactive prototypes to present to clients, speeding up the process of getting approval and increasing clarity of desired outcomes
- Implemented code testing tools that improved workflows by up to 40% and helping catch potential bugs earlier.
- Contributed to an in-office culture of inclusivity and positivity

### Software Developer

*Thrive Career Wellness | 2021 - 2022*

- Collaborated on a SaaS product that helped users throughout various stages in their career transition, utilizing Ruby on Rails, Handlebars and Javascript.
- Member of the development team that completed a major business project, successfully achieving >100% of Product and Business growth objectives in 2021.
- Contributed to developing responsive design, new feature components, and defined a user flow to ensure a seamless user experience.

### Web Developer

*Freelance | 2020 - 2022*

- Worked with creative clients and digital agencies to design and build websites to tell their stories online, and connect with customers in a seamless experience.
  - Somewhereelse - Worked closely with designer to redesign the website, and created a customized experience that reflected the client's new offerings into the digital space. Built with Gatsby, React, GraphQL, and Wordpress as a CMS.
  - PureSunFarms: COA - Worked with client to produce a page where the customer can search a production lot number and be provided with detailed, scientific information on their product.
  - SonofRand - Worked with client to add new features, using Liquid and SCSS
